You Must Send Comments to the FDA - Now!

FDA has issued Proposed Guidelines for the sprout industry.
They are accepting comments until December 13, 1999.

The Proposed Guidelines Would:

- 1)** Put all Certified Organic Sprout Growers out of business.
- 2)** Force all sprout growers to have in-house laboratories.
- 3)** Not make sprouts safer.
- 4)** Make the annual dumping of over 26 Million Gallons of Bleach OK.
- 5)** Make it even harder to get good bacteria into your diet.

The New Guidelines Must:

- 1)** Create a safe source of seed – intended specifically for human consumption.
- 2)** State that “Certified Organic Seed is considered an acceptable alternative approach to prevention of microbial hazards in sprouted seeds”.
- 3)** Create a government certification that labels seed grown for human consumption as such (i.e. Grade A Beef) and make it mandatory that sprout growers use that government certified seed and/or certified organic seed.

Thank you - again - for your help =:->
